Licensing

Without a license, the PM is in private customer or business customer demo mode.
In this case, it is possible to manage a maximum of 10 projects. This number applies to the number of projects in the central memory.

Details on prices, licenses and ordering can be found at www.SmartHomeTools.de.

When you purchase a license, you will receive access data to our license portal:

https://cloud.SmartHomeTools.de

After logging in, you can check in the menu item "Licenses" whether and which licenses are available for you. To transfer the license to a device, all you have to do is enter the assigned ID, which you will find under your name at the top left, in the software during the license query and follow the instructions. After an email confirmation, the process is complete. Internet access is required at least once for this process.
