Projects Repository

Operation is via the menu icons or the context menu of the project lists.

"**Check out**" The project is copied to the local project path and unpacked. See also "repository mechanism".

„**Undo check-out**" If the project has been checked out, this can be undone. The checked-out project is not removed.

„**Open History**“ Opens the history. Also possible by double-clicking on the project line.

„**Delete**“ Deletes the project in the repository.

„**Open project directory**" Opens the directory of the checked-in project file. Only required for exceptions.

"**Open shelf directory**" Opens the directory in which old project statuses of the repository archive are stored. Only required for exceptions.

„**Move project**" Moves the project to another repository unit.
