

Settings

The screenshot shows the 'Settings' window with four numbered callouts:

- 1**: Points to the 'Repository:' section header.
- 2**: Points to the 'Version statuses repository shelf' column, which contains a dropdown menu with values 10, 5, 10, 15, 10, 20, 10, and empty rows.
- 3**: Points to the 'Repository name' column, which contains text input fields with values 'Customer', 'Transfer', 'OneDrive', 'Partner A', 'Partner B', 'Abt. Security', 'Training', and empty rows.
- 4**: Points to the 'License:' section, which displays 'Projects in use: 193' and 'Extended project types, Unlimited Projects'.

The 'Repository:' section contains a table with the following data:

Repository	Version statuses repository shelf	Repository name
<input checked="" type="checkbox"/> \\TECS-HPE\PM-Speicher\Kunden	10	Customer
<input checked="" type="checkbox"/> \\TECS-HPE\PM-Speicher\Übergeben	5	Transfer
<input checked="" type="checkbox"/> E:\PM-Speicher\OneDrive	10	OneDrive
<input checked="" type="checkbox"/> \\TECS-HPE\PM-Speicher\Partner A	15	Partner A
<input checked="" type="checkbox"/> E:\PM-Speicher\Partner B	10	Partner B
<input checked="" type="checkbox"/> E:\PM-Speicher\Abt Sicherheit	20	Abt. Security
<input checked="" type="checkbox"/> E:\PM-Speicher\Training	10	Training
<input type="checkbox"/>		Speicher 08
<input type="checkbox"/>		Speicher 09
<input type="checkbox"/>		Speicher 10

The 'License:' section shows:

Projects in use: 193
Extended project types, Unlimited Projects

A 'Save' button is located at the bottom right.

"Repositories (#1)" The projects are moved to these folders after being checked in to the respective repository. More on this under "Project sharing".

The repository folder should be a network path or a cloud folder that is set up on all computers.

"Version statuses repository shelf (#2)" Determines the number of project versions in the shelf of the repository. This setting is saved in the repository folder and therefore applies globally.

"Repository name (#3)" Defines the name of the repository. This is used to the main view and the logs.

"Licensing (#4)" Shows whether a license has been purchased/imported for the project manager and how many projects have been activated.

Revision #1
