

Cloud license "C"

After the purchase you will receive access data to our license portal:

<https://cloud.SmartHomeTools.de>

In the "Licenses" menu item, you can check whether and which licenses are available for you. To transfer the license to a device, all you have to do is enter the assigned ID, which you can find under your name at the top left, into the software in the license query and follow the instructions. After an email confirmation, the process is complete. Internet access is required at least once for this process.

Revision #1
